

$$E = mc^2.$$

This is **correct**.

$$f(x) = (x + a)(x + b) \tag{1}$$

$$= x^2 + (a + b)x + ab, \tag{2}$$

This is **incorrect** since the last comma should be a period.

$$e^{i\pi} + 1 = 0.$$

which is **incorrect** since the last period should be a comma.
